

PROBLEM SOLVER

PROBLEM:

When trying to cut copper stranded cables:

- Large cables cannot be cut by regular side cutters.
- Cutting with a hacksaw is time-consuming, requires a vice, and leaves badly frayed ends.

SOLUTION:

Copper Cable Cutters

- Comes in 2 sizes:
 - Small size easily cuts copper cable up to 4/0 Ga.
 - Large size cuts up to 500 MCM cable.
- Quickly cuts cables with no extra tools required.
- Leaves no frayed ends.
