

PROBLEM SOLVER

PROBLEM:

Repairs to unknown or dissimilar steels, studs, and bolts can be challenging.

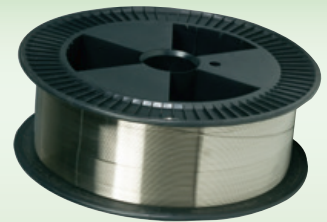

- Joining together unknown steels.
- Previous experience with weld-induced cracking.
- Removing bolts or studs without damaging threads.
- Out-of-position or difficult-to-reach work areas are often common.

SOLUTION:

Cronatron® 333 Dissimilar Steel Electrodes and Wires

- Can be used on any steel, even when the composition is unknown.
- Can be used in any position.
- Resists cracking.
- Easily extract broken and rusted bolts, regardless of position.
- No need to drill and tap or use easy outs.
- Specially designed flux protects threads.

APPLICATIONS:

- Automotive and trucking
 - Leaf springs
 - Worm drives
 - Broken stud removal
- Manufacturing facilities
 - Equipment parts
 - Dissimilar steels

INDUSTRIES:

- Agriculture
- Construction – Heavy equipment
- Equipment Rental
- Government
- Manufacturing
- Mining
- Waste Management
