

PROBLEM SOLVER

Many Customers Have Experienced The Following:

PROBLEM:

Finding an effective metal-cutting fluid that is safe on a variety of metals. Ordinary metal-cutting lubricants:

- Will stain metals such as aluminum
- Tend to sling off drill bits and reamers
- Fail under extreme pressure conditions
- Require multiple products for different operations such as tapping, reaming, cutting or drilling
- Are costly and can't be diluted

SOLUTION:

ETP™ Gold Metal-Cutting Lubricant

- Safe on a variety of metals including steel, aluminum, titanium and stainless steel
- Clinging formula stays where it's applied and won't sling off
- Significantly extends cutting tool life and provides cleaner cuts
- Ideal for tapping, drilling, reaming and cutting in hand-held and machining applications
- Available in convenient aerosol or in liquid form that can be diluted for economy

“Let me show you how it works”

APPLICATIONS:

- Drill bits
- Reamers
- Dies
- Taps
- Saw blades
