

Spray Cup System

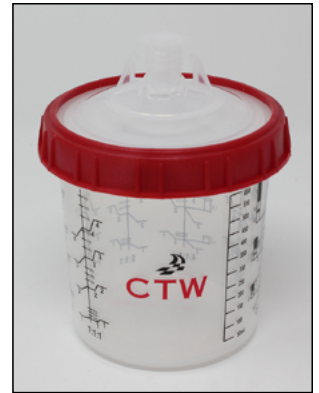

Uses a simple and efficient four-piece design familiar to many paint professionals. This system is manufactured to CTW's exacting standards, using only top-self, silicone-free materials. You can trust you are buying the best quality system on the market.

- Durable Collar: Assures a secure connection to the hard cup, time after time, without stripping or breaking
- Reinforced Nozzle: Prevents breakage and provides a very secure connection to the paint gun adaptor
- Precise Application: All lids include a full diameter filter which equalizes pressure, allows for consistent paint flow and prevents spitting
- Collapsible Liner: High-quality plastics produce a very pliable, collapsible liner which maximizes paint use and minimizes waste
- Paint System Includes: Hard Cup and Collar, 50 Liners and Lids, and 20 Plugs

Plastic Paint Mix Stick Paddles

High quality plastic paint paddles for professionals. The S-shaped curved design of our 8" virgin plastic mixing sticks allows the painter easier and quicker mixing. Holes break the stirring resistance and make it suitable as a whisk.
