

Technical Data Sheet

So-Drox Liquid Drain Opener and Sewer Line Restorer

DRUMMOND™
A LAWSON PRODUCTS BRAND

Overview

So-Drox is the strongest, non-fuming, non-acid drain opener on the market today. Uniquely formulated and designed to dissolve and remove obstructions in clogged or slow-running drains. Removes grease, hair, food, paper, soap scum and other organic materials. Highly concentrated solution cuts right through water and directly attacks the source of the clogged or slow-running drain. Non-fuming, has no harsh chemical odors. So-Drox is safer to use on all types of plumbing material. Regular use prevents plumbing problems and water damage caused by backed-up drains. Liquid formulation is easier to use, works faster, and goes directly to the source of the problem – including through cold or stagnant water.

Applications

- Hospitality and Lodging
- Industry and Manufacturing
- Plumbing and Heating
- Food Service and Processing
- Sanitation
- Drains
- Grease traps
- Sump pits

Method of Application

Liquid

Sizes

Quart, Gallon, Pail and Drum

Mates/Relates

Pail-Top Peristaltic Pump, Zymox, DF 5000 and HG200

Directions for Use

Read the entire label and SDS for proper use, handling and storage before using this product. Larger or smaller drains may require more or less product.

1. Pour up to 16 oz. (500 ml) of So-Drox slowly over drain. Allow to work for 30 minutes. Flush with hot water. For tough clogs, let So-Drox stand overnight before flushing.
2. Maintain drain using 8 fl. oz. (250 ml) once a week, and let it work for 15 minutes before flushing with hot water.

Technical Specifications

- Color: Clear
- Scent: Lemon
- pH: > 13.0+
- Viscosity: Water Thin
- Shelf Life: Minimum one year
- Warranty: Minimum one year
